WATER IS SAFE TO DRINK

- Despite some odor and taste issues this week, the water remains safe to drink.
- Crews have been adjusting the treatment process to address the problem.
- Taste and odor issues are common in the summer due to warmer water temperatures.

Troxler Avenue Project.

The Troxler Avenue widening project is complete and has added an additional lane down the entire stretch of roadway from Route 160 to Route 140 /143, giving residents of Augusta Estates and traffic for the new hospital a turn lane. Curbs and gutters along Troxler Avenue have been added. A multi-use path, similar to the path along Frank

Watson Parkway, has been constructed on the south side of Troxler Avenue along the front of the hospital property to the corner of Troxler Avenue and Route 160. The path then turned south and runs along the west side of Route 160 along the hospital property. This path will eventually run along the entire south side of Troxler Avenue to Route 40 /143.

PROJECT BY THE NUMBERS:

- Project Cost: - \$850,000
- Concrete Widening—2400 linear feet
- Curb and Gutter—5000 linear feet (that's almost a mile)
 - Storm Sewer—2600 linear feet
- Multi-use Asphalt Path—3350 linear feet
- Rock—Over 3,500 tons (that's 7 million pounds)
- Concrete— Over 4,200 tons (if you were to take this much concrete and make it into 1' by 1' blocks and line them up end to end, they would stretch over 10 miles.)

The project was completed before the opening of the hospital, as planned.
